APPROVED SUCCESS THE GLENCHEN EXHIBITION Complete Prize List—Good Exhibits and Sports

The third Annual exhibition of the Gleichen District Agricultural Association proved to be one of the most successful exhibition in the history of the association despite the reports that the project was an off one in the space of over twenty three years in which farming operations have been carried on here.

Below will be found a number of extracts from the Calgary newspapers which show the opinion of men who have visited nearly all the fairs in Alberta:

Calgary Daily News: The two days fair held in Gleichen opened on Tuesday. The weather was all that could be desired and for the opening day the crowd was exceedingly large fully 800 being present. The opening day was devoted chiefly to the judging and comparatively little time was devoted to the sports. On the 14th, Mr. Elliott, of the C.P.R., demonstration farm at Strathmore, made the opening address and spoke optimistically of the future for the district and town, and congratulated the management upon their success in putting on such a successful fair. He closed by urging the people to get together in a closer co-operation and unite in making Gleichen a fair larger and better in every way. The large agricultural hall was crowded to the doors with splendid specimens of vegetables, grains and grasses, the big turnips, three of them weighing 60 lb. each, formed one of the best features as to vegetable display. Of cattle and horses there were but few entries, while all other classes were crowded.

The Calgary Morning Alberta said: With 3000 visitors, 60 entries, nearly 800 classes, and some of the best sport seen for a long time in the district, the Gleichen fair proved an unqualified success. The third of the kind, establishing an exhibition was well taken during the past two days. Wednesday was of course the gala day, and a special train from Calgary carried the townsmen to, together with an immense number of people and a large surrounding country, swelled Gleichen's population half as many again. In the afternoon a great number of the crowds that they almost swamped the market place. The great standard field at the time when the races started. The organization was as really perfect as possible, and reflected the greatest credit upon the officers of the exhibition.

"I am extremely satisfied with year, was a little under the exhibition this year. It is greatly superior to some reports to the exhibition of last year. It was a worthy of commending. With President James Young at the head of the show, the exhibition was a success. I am particularly delighted with the show of horses. It finally they entered six stallions, grows better every year."

A. J. McArthur, the number even then the Clark Brothers did not have a monopoly on the prize. It was one of the best he had seen in the small towns of Alberta. As for the exhibits, they had the best in the fair, with a pretty little exhibition of the best in the district. The exhibition was a success. I am particularly delighted with the show of horses. It finally they entered six stallions, grows better every year."

The showing of vegetables was in the Gleichen class at the home which carried off the championship at the fair. The exhibition was a success. I am particularly delighted with the show of horses. It finally they entered six stallions, grows better every year."

Recount Gives A. J. McArthur a Majority of Even 200

E. H. Riley has 919 Votes and A. J. McArthur 1119

Returning Officer W. W. Brown had a busy time of it all day, Thursday, at the recount of the Gleichen election. Starting at nine o'clock in the morning the work continued until 10 that evening. It is reported as agent for A. J. McArthur, and those of W. Riley as agent for E. H. Riley, while J. W. Lorne acted as clerk. There were many points disputed, chief among them being the holding of a Court of Enquiry at the Gleichen polls, held by Deputy Returning Officers F. E. Renauld, H. F. Dreisher and J. S. Laycock. J. P. Riley's chief objection was to the opening of the ballot boxes at Court of Enquiry. The members of the Court state that they did not receive any notice that the Court of Enquiry was "called off," and acted on their interpretation of the Act. There were five objections received by Mr. Riley, and there were nineteen spoiled ballots and two cancelled ballots.

Returning Officer W. W. Brown stated in a report that he was satisfied that E. H. Riley won the popular majority of the vote, and explained that the 200 majority for A. J. McArthur were obtained from the railroad camps and the telephone men, which he claimed really had no right to be counted in this constituency as they would not be here when another election came around.

B. S. Cory, on being interviewed, said that although considerable talk and capital has been made by the followers of Mr. Riley that the railway collected men, another, a person of the official return will conclusively show that this contention is not correct; but on the other hand the straight liberal candidate was elected by the vote of the farming class.

Following is the official table of the recount by the Returning Officer:

Poll	McARTHUR	RILEY
Gleichen 1st	63	42
Gleichen 2nd	51	28
Nasauk	12	1
Strathmore	61	61
Chesley	13	20
Langdon Valley	46	35
Sheppard	20	41
McArthur	17	6
Freeman	14	7
Rocky Ford	14	1
Higgs	56	5
Hicks	4	22
Simons	21	13
Bedford	35	41
A. E. Edwards 1st	13	9
Williams	67	11
Irwin	17	9
Two Bar	14	1
Cherry	11	16
Croft	9	11
Bassano	70	65
Brooks	68	37
Row River	37	17
Strathmore	11	3
Crescent Heights	49	32
St. John's	89	49
Riverside	35	91
Sunnyvale	35	91
Hillhurst	5	97

PORTUGAL NOW QUIET

KING MANUEL AND THE QUEEN MOTHER AT GIBRALTER

Republicans Reign Supreme, But Many Sympathizers of Monarchy Are Prepared to Fight for Manuel—Republic Proclaimed at Oporto—Only Revolutionist Troops Allowed to Enter Lisbon.

Lisbon.—The points in the government's programme are:

First—The development of public instruction and national defences on land and sea.

Second—Administration decentralization.

Third—Colonial autonomy.

Fourth—To guarantee fundamental liberties by judicial power.

Fifth—Expulsion of monks and nuns.

Sixth—Obligatory civil registration.

Seventh—Lay instruction.

Eighth—Separation of church and state.

Ninth—The strengthening of the credit and finance of the country.

Lisbon.—While the city of Lisbon is in the hands of the revolutionists, and a republic has been proclaimed with Theophile Bragas as president, and other prominent Republicans constituting the ministry, there are yet many thousands in and around the city who are loyal to monarchy.

The monarchists include a portion of Lisbon troops and troops massed in entrenched camps about the city. Thus far these have refused to ally themselves with the revolutionists, and the provisional government is taking steps to enforce allegiance.

The people of Lisbon are ignorant of the events in the provinces and, therefore, it is not known whether the movement is broad enough to sweep the country. Nevertheless, the Republicans are proceeding as though the transformation was an accomplished fact to stand for all time.

For some months past preparations have been going on for the overthrow of the King, and it had been definitely arranged to raise the cry of revolution. It happened that the King was about to take up his residence at Cascaes, and the warships were ordered to proceed there. The navy, which is the chief support of the revolutionists, thereupon decided to act immediately, otherwise the defensive armament of the country would be able to offer no assistance in carrying out the plan.

The Republican chiefs, accompanied by numerous partisans, went to the barracks of the sixteenth regiment of infantry. The doors were immediately thrown open to the populace and arms distributed. The barracks of the first regiment of artillery were next visited, and the guns dragged forth. The revolutionists marched to the highest point in Lisbon, a fine strategic position, where the artillery was mounted, threatening the city. The government troops immediately took up a position in the centre of the town, about two miles distant from the revolutionists, where heavy guns and Maxim guns were placed to oppose the revolutionists.

Meanwhile the insurgent cruiser Adamastor steamed up in front of Lisbon, ready for the bombardment, while the cruiser Rafael proceeded down the river, taking her station opposite the seamen's barracks. The cannonading commenced and the whole town trembled to its foundations. A regiment of the municipal cavalry made a brilliant charge in an endeavor to take the insurgents' encampment near the railway, but were met with a terrific fire. This regiment was almost completely annihilated, only three men escaping.

The revolutionists showed extraordinary courage and sustained an attack on all sides by superior forces for two days and nights. The Adamastor shelled the Neceadades palace, and King Manuel and the Queen Mother Amelia were forced to escape to Cascaes, from which place they went to Mafra. The same night the Adamastor and Rafael shelled the centre of the town, doing much execution to the monarchist forces, and finally the latter, tired of carnage, surrendered, the Republic was proclaimed in the afternoon and the Republican flag hoisted on the public buildings.

The provisional government has issued communications to the foreign powers notifying them of the proclamation of Portuguese republic. No serious obstructions are expected to be offered by the provinces to the new regime. The government has already appointed civil governors of the different provinces. The Brazilian President-Elect Marshal Hermes Fonseca, passed through the streets with the provisional president. Both were enthusiastically greeted by the people. Order has been restored throughout the greater part of the city.

Barbed Wire is Only Used in West

Hamilton.—At a meeting of the commission on technical education Rev. Dr. Bryce demanded of H. L. Frost, a wire manufacturer, if he thought it became a Christian to manufacture barbed wire, and Mr. Frost said: "It did not, but that little of it was used except in the west."

Mrs. Lyle, of the Local Council of Women, said they were interested in the training of women for home work. She thought there should be a department in connection with the technical schools for the training of the girls for housework. Mrs. Robert Evans endorsed this suggestion.

Dynamiters Said to Be Quartz Miners

Los Angeles, Cal.—It is believed that the men who carried out the plot to wreck the Times building were expert quartz miners from the gold districts of northern California. This theory is based on the fact that the men who purchased the dynamite used the name of J. L. Bryson, a Placer county miner, and detectives are trying to track them back to the mining districts.

Will Not Press Death Penalty

Toronto.—It is understood that it is not the intention of the crown to press for the carrying on of the death penalty in the case of Mary Dolan and Thos. McNulty, sentenced at Barrie to be hanged on Dec. 14 for the murder of their illegitimate child.

HEAVY YIELDS IN ALBERTA

Farmers Will Reap a Much Better Harvest in North Than at First Anticipated

Edmonton, Alta.—That Northern Alberta farmers will reap a much better harvest in all grains than was at first anticipated, is the consensus of such crop reports as are coming in from the harvest fields, where the reapers have been busy for weeks and where the hum of the thresher is now beginning to be heard.

Northern Alberta experienced none of the prolonged dry weather that was so prevalent in the more southern portions of the province and Saskatchewan. As a result all crops came forward to the harvest season in splendid condition. In fact, many of the more prosperous farmers anticipated bigger crops than in many years.

But the three weeks of heavy rain in the latter part of August not only gave a bad set-back to the harvest, but it will have the final result of lowering the grain a grade or two. Nevertheless, Northern Alberta will reap a fairly good crop this fall.

The latest estimate of the authorities of the provincial agricultural department of the yield for all Alberta is 30,000,000 bushels. This is a fairly liberal estimate and the authorities will not be surprised if the yield does not come above the 25,000,000 mark. Last year the yield was 33,000,000. The highest yields will be in the Edmonton district and within a 100 mile radius of Edmonton, and also in the Pincher Creek and Magrath districts to the far south, where there was very little dry weather and good steady rains.

The latest estimates of the Edmonton board of trade of the yields in the districts, state that winter wheat will be above the average, while spring wheat will fall below the average, and the same with oats, while there will be a good average yield of barley. There has been considerably more winter wheat grown this year than formerly.

NO IRON ON EASTERN SLOPE

Geological Formation of the Eastern Slope of the Rockies is Not a Mineral One

Edmonton.—All hopes ever held by prospectors and others that mineral indications in the eastern slope of the Rockies, discovered from time to time, could be traced to extensive deposits of minerals, are given a cold douche by the statement of Dr. D. B. Dowling, Dominion geologist, who has just returned from a trip west to the mountains and who states that the entire eastern slope of the Rockies will never produce any extensive or valuable deposit of mineral.

In making this statement Dr. Dowling has merely stated what has long since been discovered to be true by himself and other geologists, that geological formations of the eastern slope of the Rockies is not mineral formation, but chiefly lime and sandstone, that the true mineral formation is to be found in inner ranges of the Rockies, which display lower strata or rock in which minerals have been deposited.

Consequently the reported discoveries of iron and other minerals at various points on the eastern slope can amount to nothing. Dr. Dowling stated that he had secured samples of iron, struck on the eastern slope near Gower, and the same statement applies to this find as to the other finds on the eastern slope.

HAS BEEN OVERFISHED

Liverpool Fish Buyer Thinks Pacific Coast Fisheries Are Being Exhausted

Winnipeg.—"The fishing in British Columbia has been done to its utmost capacity, in fact the Pacific coast has been over-fished," said D. Thomson, Liverpool, who passed through Winnipeg recently on his way to Vancouver. The visitor is the representative of Simpson, Roberts & Co., one of the largest firms of canned fish buyers in the United Kingdom. Mr. Thomson stated that the total pack of salmon on the coast in 1909 was 5,000,000 cases, amounting to a sum of \$25,000,000. This year there were only about 3,000,000 cases.

The Dominion and United States governments had a scheme to try and improve the regulations which had been enacted to go up the river to spawn. Unless something was done in this direction the fishing industry on the Pacific coast would be considerably decreased.

BOURASSA'S POLICY OPPOSED

Le Temps Says it Would Produce Disastrous Results to French People

Ottawa.—Le Temps, the French organ here, has a strong article against Bourassa's anti-naval campaign, particularly its support by semi-religious papers. It says: "That the French get their liberties from Britain and what would harm the British Empire would produce disastrous consequences in Quebec. The effect of such a campaign as Mr. Bourassa is carrying on will be far above the possible defeat of any government."

Marconi Claims Long Distance Record

New York.—A new long-distance record for wireless transmission is claimed by the Marconi Telegraph Company, which announces that the officers were informed in a dispatch from London that Mr. Marconi, who is now in the Argentine Republic, has succeeded in receiving signals direct from Glace Bay, Nova Scotia, and from Clifden, Ireland, at the high power station now almost completed in the Argentine Republic. The distance covered is estimated at 5,600 miles.

Wellman Has Chosen Crew

Atlantic City, N. J.—Walter Wellman, who declares that he will attempt to cross the Atlantic in the dirigible airship "America," has announced the personnel of the crew which will accompany him. Melvin Vaniman will be chief engineer. He was with Wellman in the unsuccessful attempt to reach the north pole from Spitzbergen.

ALBERTA MAKES GOOD

PLAYED PROMINENT PART IN DRY FARMING CONGRESS

Prize for General Display of Dry Farm Products was Awarded to Alberta—Congress May Be Known in Future as the "Scientific Dry Farming Congress"—Congress to Meet in Alberta in 1912.

Spokane.—With the prize for general display of dry farm products awarded to Alberta, and Lethbridge pulling for the congress in 1912, Canada, and particularly Alberta, has played a prominent part in the fifth dry farming congress.

Although the 1911 meeting was early conceded to Colorado Springs, which sent the first delegation to arrive in Spokane, Lethbridge put in a formal invitation and urged the advantages of the district not of the Canadian boundary to strengthen its chance next year.

Alberta and Saskatchewan were well represented, both in number of delegates and in the speakers. Among the speakers were Hon. W. R. Mowtherell, of Regina, on "Saskatchewan as a field for dry farming," Hon. Duncan Marshall, minister of agriculture at Edmonton, Alberta, and several others.

A prize was given Mr. N. Rose of Regina, for the most complete and practical display of monthly reports of a farming company.

The Macleod district won second prize for district or country products, and third for the best display of agricultural products by any agricultural body.

In the latter event the second place was taken by the Cardston board of trade. Macleod also took the award for the most artistically arranged display of apples. Arthur Perry, of Cardston, had the best exhibit of potatoes raised under dry farming methods.

The Canadian representative on the dry farming extension committee was J. H. Fraser, of Saskatchewan. On the credential committee were Thos. Woolford, of Alberta, and John Miller, of Saskatchewan; on the committee of nominations were D. W. Warner, of Alberta, and E. J. Merlooke, of Saskatchewan; on resolutions were W. W. Fairfield, of the Lethbridge experimental farm, and J. H. Fraser, of Saskatchewan. Hon. W. R. Mowtherell, of Saskatchewan, was elected vice-president for that province and Hon. Duncan Marshall, of Alberta, was elected president.

Other distinguished guests were Hewitt Bostock, of Ducks, British Columbia, representing the English government; Professor Bracken, of Saskatchewan; Hugh McKenzie, land commissioner of Australia; Elwood Mead, commissioner from Victoria, Australia, and Attorney-General C. R. Edinborough, of Alberta. The discussion of national and state conservation, a dominant issue in the United States, was studiously avoided, as was the alleged domination of the dry farming congress by James I. Hill.

A well received suggestion was that the organization be known as the "Scientific Farming Congress," as a better designation of its purpose.

FARMERS ARE PLOWING

Western Soil Tillers are Cultivating Their Wheat Land Now

Winnipeg.—Thousands of acres of wheat lands in the west that never before were extended the courtesy of a fall plow are being given an after-harvest cultivation this year, according to reports being received by General Grain Agent, of the west. "With the windmill effect of the threshing throughout the west," said Mr. Atcheson, "the farmers are getting busy with the plowing. In sections where fall plowing in former years was not considered necessary, fall cultivation is being carried on this year. Following the probable decrease in the wheat output, farmers are realizing that if they are to get big harvests they must help nature along and pay some slight attention to cultivation." Mr. Atcheson's reports from the three western provinces show that ten times the area of land formerly plowed in the fall is being turned over this year. Threshing has been completed save for districts in the north where operations usually extend into early winter.

ROYAL NIMROD RETURNS

The Crown Prince of Hesse Had Good Sport on the Rockies

Calgary.—His royal highness, the Crown Prince of Hesse, and party, who are on a tour of the west, have just returned from hunting in the Columbia valley, and have experienced the very best luck. A Rocky mountain goat and a huge grizzly bear, valued at 7 feet, were shot. Trophies of the hunt, Baron Riedesel shooting the goat and Baron Schonk killing the bear. The crown prince enjoyed the fishing, and spent most of his time angling for the finny tribe.

Immigration to Canada Has Increased

Ottawa.—For April, May and June, the first three months of the present fiscal year the total immigration to Canada has been 130,331 persons, or an increase of 76 per cent. over the corresponding months of last year. Those arriving at ocean ports numbered 84,831, as compared with 41,129 in the corresponding months of 1909, or an increase of 106 per cent. while immigration from the United States amounted to 45,500, as against 39,294 for the same period last year, or an increase of 38 per cent. For the month of June, 1910, the total immigration was 34,560, as against 20,869 in June, 1909, or an increase of 66 per cent.

C. P. R. Engineers Expect Increase

Winnipeg.—Locomotive engineers on the Canadian Pacific railway are expecting an increase in wages, and it is understood that a substantial raise is looked for. The matter is under consideration by the Association of Railway Companies' officials at Minneapolis, and the territory affected is that between Fort William and the coast.

CANADA WELL KNOWN

The School Children in the Old Country Are Very Well Informed on Canadian Affairs

Calgary.—J. B. Marsh, manager of the Eureka Real Estate Agency, has returned from a four months' visit to the Old Country, most of which was spent at his old home in Leicester.

Mr. Marsh says that wherever he went he heard a great deal of talk about Canada, and more especially the province of Alberta. There will be a large immigration next spring from the Old Country to Western Canada, a large number of those contemplating coming to Canada being well-to-do farmers' sons, who will be in a position to purchase land and start farming operations on a business basis.

Mr. Marsh said that he was very much surprised to find the people of the Old Country so well informed in regard to Canadian affairs. This was especially noticeable among the school children, and both teachers and pupils appear to take a great interest in getting information in regard to the Dominion.

At one of the schools Mr. Marsh visited he asked a class of boys some questions in regard to Calgary and the province of Alberta, and found that they had a very fair idea of conditions here.

One of the questions he asked was, "What is the distance from Calgary to Edmonton?" and immediately the reply came, "About two hundred miles." The visit of the Queen's Own Rifles of Toronto to England also attracted widespread attention, and will prove of immense advantage to Canada, in more ways than one.

The attention of people of means is also being directed to Western Canada as a field for safe investment, and farm lands and city property investments are receiving special attention.

OPEN BRAZEAU COAL DISTRICT

C. N. R. is Making Preparations to Build Line to Tap Mining Region

Calgary.—That the Canadian Northern railway intends to open up the rich Brazeau coal fields in this province is practically assured. At the present time an application is being made to the legislature for a charter for "The Canadian Northern Western Railway Company," to construct a line from Edmonton or Strathcona to a point on the boundary line between Alberta and British Columbia, at or near the Pine or Peace River. Under this charter it is also proposed to construct a line from a point on the Canadian Northern line between Edmonton and Calgary, to a point at or near Rocky Mountain House, and from there to the Brazeau and Macleod rivers, and along these rivers to a point on the C. N. R. main line west of Edmonton. The charter also asks for power to construct any branches necessary from their lines into the various coal areas in the vicinity.

It is generally conceded that the road is really part of the Canadian Northern system.

WILL PLACE BIG AREA ON SALE

About 60,000 Acres of Land in Dead Horse Lake District to be Sold Soon

Calgary.—That the tale of the return of the American settler to his own land is a myth will be conclusively proved at Bassano, where two carloads of well-to-do farmers from Iowa and neighboring states have arrived. The C. P. R. has reopened its land office for the next two months, and it is intended that Bassano shall be the sales headquarters for this company for the remaining part of 1910 and the whole of 1911.

It is also the intention apparently, to open up 60,000 acres of non-irrigated land at the first of the month in the district, about twenty or thirty miles north of Bassano and east of Dead Horse lake. The projected C. P. R. line from Didsbury on the C. & E. to Kinross, on the main line, which is even now building, will run through this section, so that no part will be more than ten miles at the most from the railway.

ACQUITTED OF MURDER CHARGE

The Jury Finds That He Killed His Son-in-Law in Self-Defence

Wetaskiwin.—Serenus Amend was acquitted of the charge of murdering Lewis Goldman by the jury recently. The affair took place near Sedgewick sometime on May 23. The evidence went to show that Goodman, who was the son-in-law of Amend, set upon the older man and beat him very badly. Amend then shot, killing Goldman.

The defence urged that Amend shot in self-defence. The jury, after a very short conference, brought in their verdict of "not guilty," and Mr. Justice Harvey concurred in their finding.

Mr. Henwood appeared for the crown and P. J. Nolan, of Calgary, for the defence.

Chinese Avoided Paying Head Tax

Vancouver, B. C.—The first session of the investigation into the alleged Chinese customs and immigration frauds closed a few days ago.

Rough estimates show that the wily Orientals have during the last four years beaten the country out of approximately a cool million dollars. The method of the Chinese was to pass the officials as merchants. Thus they escaped payment of the head tax of \$500.

Contrary to Agreement

Ottawa.—The big gun practice of the United States gunboat Nashville on Lake Superior is contrary to the Rush-Bagot agreement, but according to the authorities here, inasmuch as the Canadian government has given permission to the United States to attach the Nashville on the Great Lakes for state naval militia training no objection can be taken.

Montreal Planning International Fair

Montreal.—If the plans of certain prominent Montreal businessmen, discussed at a meeting recently, materialize, Montreal will have a Canadian French-British-American exposition next year.

A TERRIBLE BUSH FIRE

FLAMES DEVASTATE LARGE AREA ON RAINY RIVER

Appalling Loss of Life and Property as a result of Bush Fires in Northern Minnesota—Conservative Estimates Place the Dead at More Than 250—Millions of Dollars Worth of Property Destroyed.

International Falls, Minn.—More than 250 dead, millions upon millions of dollars worth of property destroyed, and 3,000 refugees flying from the flames is an epitome of the happenings of the day in the Beltrami county fires.

Thirty-five typhoid fever patients were carried on improvised litters from Spooner just before it was wiped off the map.

Forty-five were carried from Beaudette, and the most of all the refugees, carried or tottering from exhaustion, was Rainy River, Canada, across the water from the fire ridden districts of Minnesota.

Then the flames hit Rainy River, destroyed the lumber mills, and 200 panic-stricken people piled into freight cars, and all but mobbed the engineer of a passenger engine, who, thinking there was no danger, started to pull them out of the town.

Later the flames subsided, and 500 refugees landed in International Falls. Men, women and children, fever patients on shutters, burned men and women swathed in bandages formed the motley crew in stock cars, like cattle. International Falls met them at the station, opened their city hall and hotel for them, and gave them beds as such as could be provided. There was no escape to the west. The east was the only chance, and it was a slim one.

Bridges and culverts had burned out, wires were down and trains were run at their full speed. All the way from Beaudette and Rainy River west to War Road, a distance of fifty miles, was a solid mass of flames. Beaudette is only a charred remnant of a town. Spooner is wiped off the map. Cedar Spur, Graceton, Pitt, Swift and Roosevelt were hamlets that are burned to the ground.

The people in the three towns of Rainy River, Beaudette and Spooner, surrounded as they have been by smoke from fires most of the summer, had become so accustomed to a sense of fabled security.

Beaudette and Spooner are located directly opposite each other on the Beaudette river where it empties into the Rainy.

Rainy River is located a mile to the east of the Canadian side of the river. All three towns are well provided with fire fighting apparatus and felt they were able to fight it successfully. However, late in the afternoon a terrific wind blew up from the south and west, twisting around occasionally with great violence, thus spreading the fire in all directions and filling the air with smoke and flames impossible to approach or combat.

On the Canadian side of the river the flames seemed to creep until it was noticed that a small fire which had been smouldering to the northwest across the railway from the business part of the town, had jumped the track and with the eddying, whirling wind, was approaching the Portage Lumber camp, yard and big saw mill.

There seemed to be cause for hope of being able to fight it successfully when suddenly the saw mill, fully a quarter of a mile from the fire, burst into flames. It looked then as if the town was doomed to meet the same fate as the towns across the river. Cars were immediately placed at the disposal of those desiring to escape by the mainline Nelson, or the Great Northern railway, and the women and children were all loaded on. The fire soon spread to the acres of lumber piles, but the wind shifted and held pretty steady in the north about that time, which enabled the fire fighters to make some headway.

MANY SPIES AT WORK

German Spies Are Working in England, But Not Expensive to Arrest Them

London.—Behind the excitement caused by the recent arrest of alleged spies in Germany and England there is an interesting story of extensive work of this nature carried on in all of the European countries by officers of the rival armies and navies. It is well known to the English press, but the papers have not published it, that the two Englishmen recently arrested by the Germans are officers of social prominence on the active list of the British navy. The admiralty solemnly affirms that the officers "were on leave of absence to study languages abroad," and the idea that they were sent on mission of espionage is indignantly repudiated.

Influential relatives of the men, soon after their arrest brought pressure on the British authorities to take retaliatory action. The reply was that it would be easy to arrest several, for there were German spies at work in England, but it was not considered expedient that the stronger influence should be brought to bear, and the authorities finally agreed to take hostage Lieutenant Helm was arrested at Portsmouth and will be committed to trial for felony.

Thinks Ireland Should Get Home Rule

Ottawa.—In moving a vote of thanks to T. P. O'Connor, who delivered an address on Home Rule in Russell theatre recently, Sir Wilfrid Laurier said his treatment of Ireland was the only blot on England's record.

He said he would not understand why England should grant autonomy to Canada and to South Africa and not to Ireland.

Hon. Charles Murphy presided. The sum realized for the cause of Home Rule amounted to over \$1,100.

Kendall Receives Crippen Reward

London.—It is announced that Capt. Kendall, of the steamship Montrose, has received the £250 reward offered by Scotland Yard authorities for first information of the whereabouts of the fugitive, Dr. Crippen.

DUKE TO BOTTLE-WASHER

Some Noblemen Who Have Fallen From High Estate.

The telegraphic despatches report that among the fortune-seekers who are rushing to Bitter Creek is the youngest son of an English duke, the son of one of the most ancient families of England. His occupation until recently was washing bottles in an American hotel at the magnificent remuneration of \$6 a week.

There are many stories of downfalls of aristocratic Englishmen which only a few people ever hear about, because they are always cleverly hushed up. How many, for instance, are aware that in Florida an English baronet is working as a day laborer for \$5 a week? He hopes to be able to come home again some day and marry a wealthy lady who is "waiting" for him. His career has been a strange one and not altogether creditable. Cheating at cards was the cause of his downfall.

Many Europeans will still remember that a famous count died in the pauper ward of one of the New York hospitals. He was the son of a prince and a grand-nephew of that great German field marshal who helped the Duke of Wellington to win the Battle of Waterloo. Another count, a man who left England because of the bitter opposition of his relatives to his marriage with an actress, is now acting as hotel-manager in one of the small hotels at San Francisco.

A former heir to the earldom of Perth and to the French dukedom of Melfort spent the last two years of his life in the air or in heaven's great tribulation is on the earth, at the end of which, immediately after it, the Son of Man will come in power and glory (Matt. xxiv, 20-30), and this is the stage of His coming referred to in the first verse of today's lesson.

Unless we see ourselves as well as the holy angels coming with Him at this time we cannot understand this lesson. Take the simplest statements, "When Christ, who is our life, shall appear, then shall ye also appear with Him in glory" (Col. iii, 4). Put with it I Thess. iii, 13, and Zech. xiv, 5, then ask yourself as a believer the question, When He shall come in His glory where will I be—with Him on His throne or before Him as sheep or goats? Put Rev. xiii, 21, with the texts already referred to, and how any simple minded believer can fail to see his place with Christ in this judgment I cannot understand. Let us then keep our place with Christ as we consider the sheep and goats. "Before Him shall be gathered all nations" (verse 2). Let the Spirit Himself tell us about it. What has He said? "Behold, in those days and in that time when I bring again the captivity of Judah and Jerusalem, I will also gather all nations" . . . and will plead with them there for my people and for my heritage Israel" (Joel iii, 1, 2). "For I will gather all nations against Jerusalem to battle" (Ezek. xxxvii, 17). "Behold, I judge between lambs and kids, between the rams and the he goats." From many places in Scripture it is very plain that as this age draws to a close Israel will occupy the land long ago given to Abraham, reaching from Egypt to the Euphrates (Gen. xv, 18). They will be recognized as a nation, and will have a patronage of Turkey, which is even now offering them Mesopotamia (if reports be true), and for a time it will seem as if their troubles were over, but their friend will break his covenant with them, nations will gather against them, and in their extremity their Messiah will appear in glory for their deliverance and to set up His kingdom. The nations which have been friendly to Israel shall share her glory, but judgment shall fall upon her enemies, even as it is written in Isa. lx, 12. "The nation and kingdom that will not serve thee shall perish." After this judgment of nations, at which time the evil triad, having done their worst against the people of God, shall be disposed of, the beast and false prophet being cast into the lake of fire forever and the devil shut up in the pit for a thousand years, then shall a king reign in righteousness, and the work of righteousness shall be peace, and the service of righteousness, quietness and assurance forever.

There are principles here, however, upon which God always acts in every judgment. That which is done to His people at any time He counts as done to Himself, whether it be good or ill. "He that toucheth you toucheth the apple of His eye." "Why do ye persecute me?" "A cup of cold water shall in no wise lose its reward" (Zech. ii, 8; Acts ix, 4; Matt. x, 40-42). As we read of those who ministered to Him when He was on earth, some think how gladly they would have done this, forgetting that it is our privilege at all times to minister to Him in the person of His people. The poor we have with us always, and whenever we will we may do them good. He that giveth to the poor lendeth to the Lord.

Notice as to the future it will either be the kingdom or everlasting fire, eternal life or everlasting punishment (verses 34, 41, 46). The everlasting is as long in the one case as in the other.

Bulyea is Re-appointed

Ottawa.—At a meeting of the cabinet council Lieut. Governor Bulyea, Alberta's first Lieutenant Governor, re-appointed for another five year term, and George William Brown, barrister, of Regina, was appointed Lieutenant Governor of Saskatchewan.

THE SUNDAY SCHOOL

LESSON III.—FOURTH QUARTER, FOR OCT. 18, 1910.

Text of the Lesson, Matt. xxv, 31-46. Memory Verses, 34-36 — Golden Text, Matt. xxv, 40—Commentary Prepared by Rev. D. M. Stearns.

This lesson is found also only in Matthew. It is called in the ordinary lesson title "The Last Judgment." If it had been added "preparing the kingdom" the title would have been correct. There are at least three judgments in the future. Dr. Scofield sees five, one for Israel only and one for angels. See his note on Rev. xx, 12. The three we refer to are the judgment for believers only at the judgment seat of Christ (Rom. xiv, 10; I Cor. v, 10), the judgment of the living nations of today's lesson and the judgment of the ungodly at the great white throne a thousand years later at the judgment of nations (Rev. xx, 5, 6, 11-15). The judgment of our sins took place on Golgotha when Jesus suffered for sins the just for the unjust, when He put away sin by the sacrifice of Himself, and He has assured us that for our sins we shall not come into judgment (I Pet. iii, 18; Heb. ix, 26; John v, 24, R. V. 3). See also Isa. xliii, 25. His redeemed ones, having faithful pious and talents and having occupied, done business, and waited for Him during this age, shall at the first resurrection, at the coming of Christ for His saints, somewhere in connection with the marriage of the Lamb, be rewarded for their service and have their places

era and Diarrhoea Remedy and castor
oil. It is certain to effect a cure and
when reduced with water and sweet-
ened is pleasant to take. No physician
can prescribe a better remedy. For sale
by all dealers.

Passing Notes on the Fair

The dances given each evening in
Mr. E. Griesbach's new Gleichen
Opera House by Brosseau Bros
proved most enjoyable and success-
ful. It deserves much more space
than we have this issue, but when
the popular Palace Hotel proprietors
announce another they can rest as-
sured of good patronage.

"If I had only known." Such
mutterings can be heard on all sides
from those who did not enter their
exhibits at the recent Gleichen Fair.
But these were not the people to
whom the success of the Fair was
due, for a great success it undoubt-
edly was.

"I've got some better than that"
was also occasionally heard; but
what they did not have was energy
and pluck enough to exhibit it and
give others an opportunity of pass-
ing their judgment.

If the residents of Gleichen and
district are desirous of making their
exhibitions a continued and grow-
ing success, now is the time to give
their efforts in that direction.

Each and every individual in the
community should choose one or
more lines of exhibits, and with the
object of attaining success study the
best methods to that end. Not only
will the outcome of their endeavors
tend to the success of 1911 Fair but
be of material benefit to the indi-
vidual progress, and thus keeping
alive that spirit of healthy rivalry
that has always been a potent factor
in the building up of nations, so it
behoves everyone to do their best to
help their home town.

The general management of the
show was, on the whole, well con-
ducted; but that was mainly due
to the untiring efforts of the few
who tried to carry out their own
and others' neglected duties. Is it
then any wonder that there was an
apparent lack of system, it was not
greatly noticeable but it was there,
more shame to the advertised figure-
heads. It will be to future advan-
tage if the board of directors get to
business a bit earlier next year.

That the sports program is an
undoubted attraction to the Fair is
generally admitted; but like all
other affairs, and perhaps more so,
they require to be conducted on a
strict and unbiased basis, with a
keen sense of fair play, eliminating
with the sternest severity any em-
blance of trickery or unfairness. It
is absolutely necessary that sport
must be clean, otherwise the public
will not stand for it, and conse-
quently they will ultimately with-
draw their patronage, and, there-
fore, doing irretrievable damage to
the prestige of the Fair in general.

The public, on at least two occa-
sions gave expressions of disap-
proval on what was apparent shady
work. It is a truly sad spectacle to
witness selfishness overpowering all
sense of fair play. So it is to be
hoped that at future events such
will be "cut out."

In the Wyandotte cockerel class
in the poultry section it will be
patriotically interesting to learn
that King George beat Teddy Rose-
velt for first place. It appears that
the royal bird had better legs than
Teddy notwithstanding the latter's
hunting proclivities.

E. Bushman exhibited a hand-
made hair bridle that attracted
great attention.

The Ladies of St. Victor's church
intend holding regular monthly
socials this season, the proceeds to
assist in defraying expenses on
their new church. The first social
will be given by Mrs. J. A. E. Beau-
pre and Miss E. Gibbons, at the
home of Mrs. Beaupre, Friday
evening, Oct 21st., for which in-
vitations have been issued. The
evening's entertainment will con-
sist of progressive whist, for which
prizes will be given, a short pro-
gramme, and refreshments. Ad-
mission 50 cents.

Nearly all of the usual local news
for the past week has been left over
in order to make room for the com-
plete prize list. There are also many
interesting items regarding the ex-
hibition that space compels us to
leave for another issue.

E. Stevens, Namaka's popular
chief of police states that from three
pounds of potatoes obtained from
the Lethbridge experimental farm, he
has this season 170 lbs. These
potatoes weighed from two and a
quarter to two and a half pounds
and there were no small ones among
them.

As usually treated, a sprained ankle
will disable a man for three or four
weeks, but by applying Chamberlain's
Ointment freely as soon as the injury is
received, and observing the directions
with each bottle, a cure can be effected
in from two to four days. For sale by
all dealers.

More Mouths to Feed

These are a few of the facts bear-
ing on the direct relation of the
live stock interest to population,
prices and general welfare. As our
population increases by anywhere
from 1,500,000 to 2,000,000 per
annum, and practically every per-
son is a meat eater, it follows that
when the number of the principal
food animals either remains station-
ary or begins to decline, the cost
of living rises and the pinch begins.
Not even the extraordinary prices
paid for live stock have thus far
been able to raise production to the
demand.

Sometime during Thursday night
a team of horses valued about \$500
was stolen from Harold Prestwich's
stables, seven miles northwest of
town, belonging to J. Rouch, who
was threshing at the farmer's farm,
and Thursday noon paid off two
men by one check in the name of
Wm. Watson, he knew little of them
as they had worked only a few
days. The men came to town and
cashed the check and not having
been seen since it is thought they
are implicated. On missing the
team and two saddles in the morn-
ing a careful search revealed the
footprints of two men leaving the
farm and returning, and also the

two horses tracks going south. The
tracks were followed to P. Umbrite's
place, where fresh tracks cut off all
traces. The mounted police are now
busy on the case and it is believed
the thieves will be caught.

Digestion and Assimilation
It is not the quantity of food taken
but the amount digested and assim-
lated that gives strength and vitality to
the system. Chamberlain's Stomach
and Liver Tablets invigorate the
stomach and liver and enable them to
perform their functions naturally. For
sale by all dealers.

The Call from now to Dec. 31st,
for \$1.50.

Gleichen's Meteorological Report

The following weather report is
